

BUSINESS INTELLIGENCE TOOL

InfoDive®

Data is a powerful tool - but only if it's actionable for your practice

InfoDive® gives you instant access to insightful, actionable information about how your practice is performing. This web-based business intelligence solution allows you to quickly and easily turn disparate datasets into insights for the optimal business performance of your practice.

Key Insights

- **Revenue cycle and profitability optimization** allows you to compile robust data to support APMs and for payer negotiations
- Determine Net Cost Recovery based on actual cost with rebates and claims payment experience with **buy & bill reporting**
- Monitor drugs dispensed and billed to ensure accuracy in claims filing with **GapFinder®**
- Compare daily dispense, days on hand and inventory turns against benchmarks for optimal **inventory management**
- Use **referral data** and patient demographics to target marketing efforts and view the entire patient care path
- Identify **OCM** eligible beneficiaries, monitor 6 month episodes and identify opportunities to improve care coordination, increase quality and lower the overall costs of patient care

Features

- Robust internal and external benchmarking data
- Pre-packaged powerful key report packets
- Automated data updates with little staff time required
- Complimentary monthly educational webinars
- Easy to use - no software to install
- Fully secure and HIPAA compliant

Optimize Practice Performance with Business Coaches

As a user of InfoDive®, you have a trusted partner by your side every step of the way. Our Business Coaches are available to InfoDive customers to help optimize the use of InfoDive across all areas of your practice and to elevate business and financial performance. Business Coaches will work with your team to leverage reports and financial data that can be used to analyze practice performance and identify potential opportunities for improvement.

Utilizing insights derived from InfoDive, Business Coaches will identify missed billing opportunities, review AR to assist in maximizing reimbursement efficiency, leverage data in payer negotiations and review key financial metrics and practice trends used to maximize revenue streams. By comparing coding, productivity and financials against more than 1,000 oncology peers and national benchmarking data, Business Coaches can provide guidance to help your practice perform at an optimal level.

Additional InfoDive data analysis includes:

- Review net cost recovery with InfoDive's Buy and Bill Report utilizing claims data and actual drug cost
- Utilize GapFinder® to evaluate drugs dispensed through Nucleus® but not billed
- Provide ongoing review of current events, regulatory issues and/or practice-specific reports to identify potential areas of efficiencies in practice operations
