

William H. Sharfman, MD

Dr. William H. Sharfman is the Mary Jo Rogers Professor of Cancer Immunology and Melanoma Research and associate professor of oncology and dermatology at the Johns Hopkins University School of Medicine. His areas of clinical expertise include cutaneous oncology, dermatology, and immunotherapy. He helped create the well-established Melanoma Program at the Johns Hopkins Kimmel Cancer Center in 1994. Dr. Sharfman serves as the director of cutaneous oncology and clinical co-director for oncology at the Johns Hopkins Melanoma Program.

He earned his M.D. from the University of Toledo College of Medicine. He completed his residency at Cleveland Clinic and performed a fellowship in hematology and oncology at Cleveland Clinic.

Dr. Sharfman's research interests include novel therapies for high risk and advanced melanoma and non-melanoma skin cancer.

The image features a central white rectangular area containing the text "Q&A". This central area is framed by a decorative border at the top and bottom. The border consists of fluid, wavy lines in various shades of blue and purple, creating a sense of motion and depth. The colors transition from deep purples on the left to bright blues on the right, with lighter, almost white highlights that suggest a glowing or liquid-like texture.

Q&A

The background of the image is an abstract, fluid pattern of flowing waves in various shades of blue and purple. The waves move from the top left towards the bottom right, creating a sense of motion and depth. The colors range from deep, dark purples to bright, vibrant blues, with some areas appearing more saturated than others.
