

**CHEMOTHERAPY MANAGEMENT SOLUTION**

**IntelliDoseTxM**

Improve safety

Increase staff efficiency

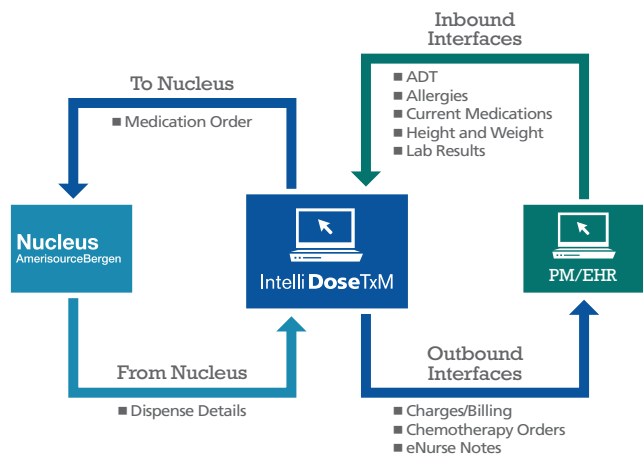

Leverage existing technologies

Your oncology practice needs a robust solution that supports physicians, nursing, billing and administration. IntelliDoseTxM is a chemotherapy treatment management module that automates your oncology practice workflow while increasing patient safety and staff efficiency.

**Key Functionality**

- **Interfaces** with your electronic health record (EHR) allowing key clinical data to flow from your EHR to IntelliDoseTxM, and passes encounter and treatment records back into your system.
- Ensures your oncology practice achieves **optimal efficiency** and has **accurate data** to manage your patients' chemotherapy treatments.
- Features an **orders module** that allows for order writing based on a customized, practice-defined treatment plan library.
- Utilizes the **eNURSE module**, a convenient point and click tool, to document care.
- Automatically captures all charges for the chemotherapy encounter using the **charge capture module**.

**Features**

- Treatment plan management
- Computerized physician order entry (CPOE)
- Nurse charting
- Charge capture

**Automate your oncology practice workflow with IntelliDoseTxM.**
